

TDG Audio Skybar™, the World's First In Ceiling Soundbar. Use three discrete boxes – One Skybar™ LCR and two Skybar™ Satellites to implement a full seven-channel immersive sound home theater. Inside the Skybar™ LCR are six 3" heavy duty, full range drivers – two for the left channel, two for the right channel, and two full-range along with a single 1" titanium dome pivoting tweeter for the center channel. The drivers are mounted on a 15 degree angled baffle to direct sound towards the audience when mounted in-ceiling, or left/right towards the audience when mounted in-wall. Flexible connections allow configuration of the Skybar™ LCR as either a complete left/right/center multi-channel setup – or the entire unit as one channel, perfect for larger listening areas. Our team is genuinely excited about music and still gets a thrill when we listen to our favorite music perfected on one of our newest creations. Of course each of our speakers is backed by our **LIFETIME WARRANTY**.
