

TDG AUDIO

ENGINEERING EXCELLENCE

The DaVinci Group is a California company founded in 2012 by world renowned custom integration veterans that have a long history of creating iconic architectural products for some of the best known brands in the industry. We utilize world-class engineering and experience to create products that recognized as “best in class.” Never satisfied to stay still we continue to create cutting edge products that have led the industry in many categories. Of course, the best products are nothing without the best service. We have been repeatedly recognized for our award-winning customer service.

Driven by our personal desire to make audio sound as close as possible to the real performance we strive to recreate music as accurately as possible. Every spot of the home should be considered a personal listening venue or home theater.

For every spot of your home...

While The DaVinci Group is one Company it features two distinct brands, TDG Audio and Vanguard Dynamics.

TDG Audio offers a portfolio of high-quality installed speakers for the widest range of installation and performance needs in and outside of the home. We offer a full range of audio products for Home Theater, Whole House, and Outdoor listening. Call today and discover how engineering excellence makes sound better.

NFC-83 : 8" In-Ceiling Speaker

The goal was to create the finest architectural speakers available. How is such a lofty goal achieved? It starts with a management team that has been designing products for the architectural audio market for over 20 years. One of those products resides in our industry's Hall of Fame. The team's experience and engineering expertise is then combined with passion to create speakers that stand apart from the ordinary. To us, great speakers create great music. Our team is genuinely excited about music and still gets a thrill when we listen to our favorite music perfected on one of our newest creations.

IWLCR-66v2 : Dual 6½" 3-Way In-Wall LCR Speaker

The TDG Audio Signature Series Home Theater Speakers are the ultimate in-wall loudspeaker system that is ready to deliver a thrilling and dynamic performance for any Hollywood blockbuster movie soundtrack or personal concert. Engineered specifically for a high performance dedicated home theater environment, TDG not only created a line of speakers and subwoofers to be mounted in the wall but also created a line that doesn't even remotely resemble the typical in-wall architectural loudspeaker. The Signature Series is a unique new product that boldly goes where the typical in-ceiling or in-wall speaker feared to tread – a reference-grade, maximum performance, professionally designed, dedicated home theater. The IWLCR-66v2 features a precision ribbon tweeter, mid range and dual 6" woofers, while the IWS-210 and IWS-10 feature 10" carbon fiber diaphragm woofers enclosed in a MDF cabinet and steel frame.

Complete 7.1 Skybar™ System

TDG Audio Skybar™, the World's First In Ceiling Soundbar. Use three discrete boxes – One Skybar™ LCR and two Skybar™ Satellites to implement a full seven-channel immersive sound home theater. Inside the Skybar™ LCR are six 3" heavy duty, full range drivers – two for the left channel, two for the right channel, and two full-range along with a single 1" titanium dome pivoting tweeter for the center channel. The drivers are mounted on a 15 degree angled baffle to direct sound towards the audience when mounted in-ceiling, or left/right towards the audience when mounted in-wall. Flexible connections allow configuration of the Skybar™ LCR as either a complete left/right/center multi-channel setup – or the entire unit as one channel, perfect for larger listening areas.

Visit our site to see our full line of in-ceiling speakers, in-wall speakers, amplifiers, subwoofers and audio systems for inside and outdoors.
All of our speakers are backed by our LIFETIME WARRANTY.
